PROFILE

A **logical** and **passionate** individual with an **entrepreneurial** mindset and a keen interest in software development and new business analysis using new technologies and software with excellent teamwork, interpersonal, and communication skills. Individual who is highly detail-oriented and eager to contribute to the development of a strong organization.

EDUCATION

Bachelor of Computer Application, Presidency College 2019 – 2022 | Bangalore, India
S.G.P.A : 9.4/10

Science (PCMC), Kensri School and College (CBSE), Percentage : 87% 2016 – 2018 | Bangalore, India

10th, Florence Public School (ICSE), Percentage : 82% 2016 | Bangalore, India

EXPERIENCE

Product Developer, PetBioTech, Indian Institute of Science (IISC) Sep 2022 – present
Built India's first research analysis software application, mainly focused on multiple animals for the wellbeing of every pet. The critical areas I focus on are full-stack development, Design, Market Research, and analysis.

Business Analyst Intern, New Heights India, Bangalore Feb 2022 – Aug 2022
Worked to focus on the major areas of development by analyzing historical and current data patterns and employing various analytical technologies and software to analyze business processes and discover improvement prospects for business growth.

Events Head | Vice President, Computantra Aug 2021 – Sep 2022
Part of the core team of Technozia, where my work focuses on managing all the events for the **national-level competitions**. Got the responsibility to manage a team of **57** skilled individuals and handled an event with over **500+** participants from across India. The primary responsibility was to create the structure, schedule, and management for the IT events.
